

Whistle Whisper

Truth, Amplified.

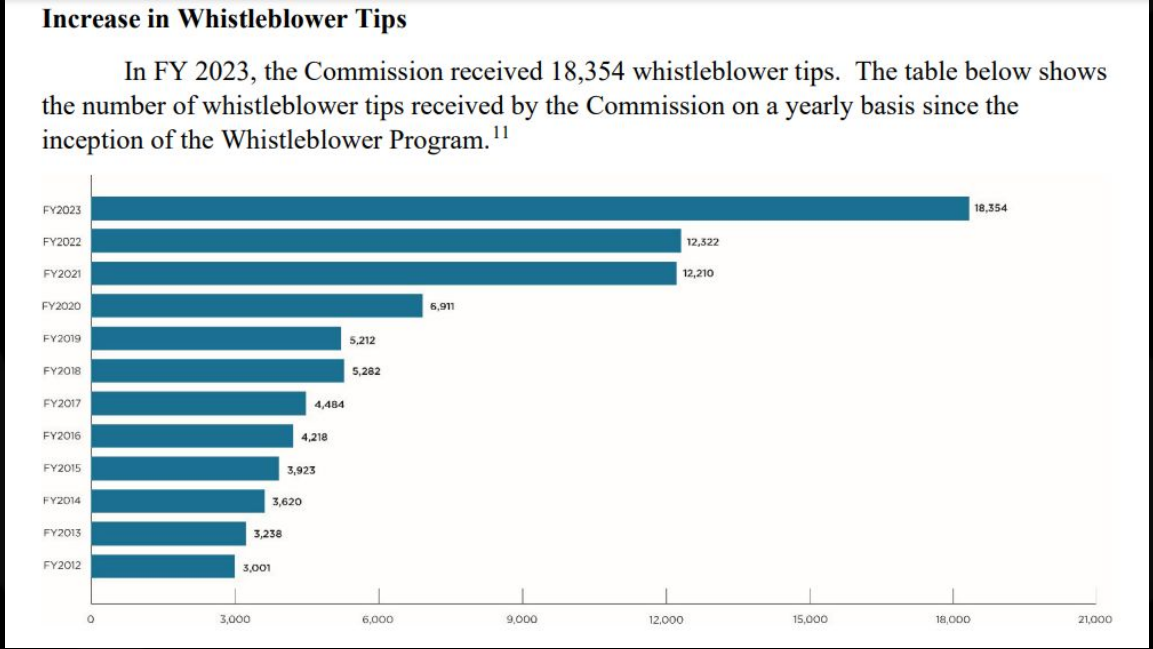

Introduction

Silence Is Not An Option

- I've always believed that speaking up is crucial when you witness wrongdoing. But my own experience with whistleblowing taught me the harsh reality. It's not just about speaking up; it's about navigating complex systems, managing fear and finding the right support.
- While various institutions worldwide have recorded increasing trends in whistleblower tips; whistleblowers are often left isolated, helpless & face retaliation for revealing the truth.
- We need better tools, better support and a stronger voice for those who dare to expose the truth.

Statistics : Increasing Upward Trends

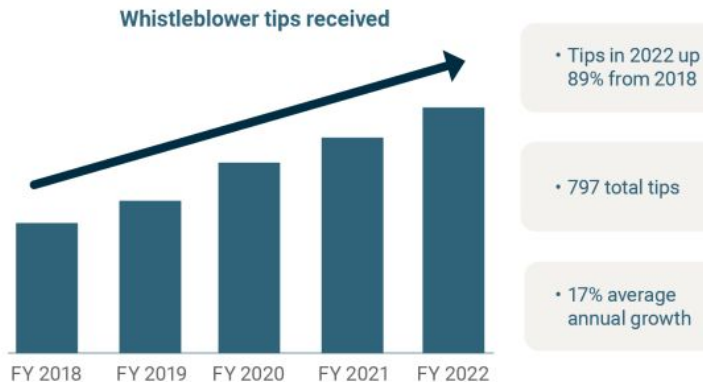

U.S. Securities and Exchange Commission - Fy23 Report

Ontario Securities Commission - 2023 Report

The growth in tips

As a new initiative, one of the priorities of the OWB has been to grow the public's awareness of the existence and the role of the Program and enhance the profile of the Program. The Program experienced an average annual increase in tips of 17%, beginning as of the first completed fiscal year in 2018. Relative to our first fiscal year, the Program generated 89% more tips in 2022. These numbers indicate that promotional and other outreach efforts yielded positive results and demonstrate that there are whistleblowers who are willing to come forward as they become aware of our Program.
